

UBAG beetrees

Lake Oswego to 39th & SE Harrison St: July 2017

[General Tree Service](#) was a perfect partner for this beetree move: a 13K lb / 120 year old heritage cedar that had dropped a limb into power lines the winter of '16/17, had extensive rot ... needed to be removed.

Bees well awake before 6am... so an extra pillow case to cover the entrance / limit the flying bees while Don and Eric made the cuts.

Don made many cuts to bring beetree down to hand-weight, then was moved to 39th and SE Harrison area where a large plexiglas cover has been mounted and cavity more fully opened ... for wonderful viewing for years to come.
